In 2018, the India Hygiene Product Market was valued at USD 1,609.04 million, which grew to USD 2,258.30 million in 2024, reflecting a CAGR of 7.43% during this period. The market's expansion was driven by rising consumer awareness of personal hygiene, increasing disposable incomes, and supportive government initiatives focused on sanitation and menstrual health. A shift in consumer behavior, especially post-pandemic, reinforced the demand for modern hygiene products such as diapers, sanitary pads, wipes, and tampons and menstrual cups, etc. Looking ahead, the market is projected to expand further, reaching USD 3,463.86 million by 2030. Key growth factors include improved access in rural regions, expanding e-commerce penetration, and rising demand for sustainable and eco-conscious hygiene alternatives. Increasing participation of women in the workforce, evolving lifestyles, and a growing elderly population are also boosting demand across various product categories.

INTERNAL RISK FACTORS

1. There are certain outstanding legal proceeding involving our Company, Group Company, Promoters, Directors and KMP and SMP which may adversely affect our business, financial condition and results of operations.

There are certain proceedings pending at different levels of adjudication before various authorities, enquiry officers and appellate forums. Such proceedings could divert management time, attention and consume financial resources in their defence. Further, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition and results of operations. A summary of the outstanding proceedings against our Company, Group Company, Promoters, Directors and KMP and SMP to the extent quantifiable, have been set out below:

Name of Entity	Criminal Proceedings	Tax Proceedings	Statutory or Regulatory Proceedings	Disciplinary actions by the SEBI or Stock Exchanges against our Promoter	Material Civil Litigations	Aggregate amount involved (₹ in Lakhs)
Company						
By the Company	Nil	Nil	Nil	Nil	2	122.58

KMPs and SMPs						
By our KMPs and SMPs	Nil	NA	Nil	NA	NA	Nil
Against our KMPs and SMPs	Nil	NA	Nil	NA	NA	Nil

The amounts claimed in these proceedings have been disclosed to the extent. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Group Company, our Promoters, our Directors and KMP and SMP, see “Outstanding Litigations and Material Developments” beginning on page 240 of this DRHP.

2. Our revenue from operations is highly concentrated in one product category and any adverse development affecting such category could materially and adversely affect our business.

We are engaged in the manufacture and sale of limited hygiene products categories. The following table sets forth certain information relating to the revenue from operations by product categories for the Fiscal 2025, 2024 and 2023:

Category	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Revenue from Operations (₹ in Lakhs)	% of Revenue	Revenue from Operations (₹ in Lakhs)	% of Revenue	Revenue from Operations (₹ in Lakhs)	% of Revenue
A) Finished Consumer Goods/Consumer Hygiene Products						
Sanitary Napkin	9376.96	81.53	5618.95	67.93	2581.64	61.22
Adult Diaper	23.73	0.21	0.00	-	10.92	0.26
Total (A)	9400.68	81.74	5618.95	67.93	2592.56	61.48

Because of this concentration, our financial performance depends disproportionately on the continued demand for and supply of our consumer hygiene products and raw materials. Any disruption in raw material procurement, manufacturing operations, distribution channels, or any adverse regulatory or pricing developments affecting these categories may materially and adversely affect our business, results of operations and financial condition. Although, as part of a deliberate strategic shift, we voluntarily slow down the sale of our own branded products in FY 2024 to reassess market positioning and optimize our product portfolio. Building on this strategy, we successfully reintroduced our own brand in FY 2025 and launched new product offerings aimed at capturing evolving consumer needs and expanding our market share. This momentum will continue into FY 2026, with further innovations and product rollouts planned to strengthen our competitive position and drive sustainable growth.

Further, although we intend to diversify our product portfolio and revenue base, there can be no assurance that such diversification will be achieved in a timely manner or on commercially acceptable terms. Our inability to broaden our revenue streams could increase our vulnerability to market, operational, or regulatory changes affecting our core categories.

As a result of these factors, our results of operations and cash flows may fluctuate from financial reporting period to period. A significant proportion of our operating expenses are fixed. Accordingly, unanticipated variations in our operations may result in variations in our results of operations in any particular financial period.

3. Our inability to timely adapt to changing consumer preferences, spending patterns, or hygiene and personal care trends may reduce demand for our products, adversely affecting our business, results of operations, financial condition, and cash flows.

The hygiene and personal care industry are characterized by rapidly evolving consumer preferences, product innovations, and changing lifestyle and health awareness trends. Consumers increasingly demand products that are safe, effective, convenient, and environmentally sustainable. For instance, a shift in consumer behavior, especially post-pandemic, reinforced the demand for modern hygiene products such as diapers, sanitary pads, wipes, and tampons and menstrual cups, etc. Looking ahead, the market is projected to expand further, reaching USD 3,463.86 million by 2032. Key growth factors include improved access in rural regions, expanding e-commerce penetration, and rising demand for sustainable and eco-conscious hygiene alternatives. Increasing participation of women in the workforce, evolving lifestyles, and a growing elderly population are also boosting demand across various product categories. (Source: Credence Research Report).

To address these trends, we have developed and marketed product portfolios under our brands such as **Femiss**, **Womanica**, **ElderFit**, and **Bloom Baby**, each designed to cater to specific consumer segments and needs. We continuously invest in product innovation, , and marketing initiatives to align our offerings with emerging consumer expectations and market trends.

However, there can be no assurance that these efforts will be sufficient or timely to match the pace of changing consumer preferences. Failure to successfully anticipate or respond to these changes could result in reduced demand for our products, loss of market share, or diminished brand loyalty. Any such outcome may materially and adversely affect our business, results of operations, financial condition, and cash flows.

4. Our brands and reputation constitute critical assets of our Company and any deterioration in them could materially and adversely affect our business, financial condition, cash flows and results of operations.

Our Company markets its products under brands including Femiss, Womanica, ElderFit and Bloom Baby The reputation, recognition and goodwill associated with these brands are central to our ability to differentiate our

products, attract and retain customers and distributors and sustain our market position. A significant portion of our growth and visibility has been attributable to the acceptance and perceived quality of our branded products.

Our brand equity may, however, be adversely impacted by a variety of factors beyond our direct control. Such factors include, inter alia, (i) lapses in maintaining requisite statutory approvals and quality standards; (ii) the sale of counterfeit, look-alike or unauthorized products by third parties; (iii) unsatisfactory service levels or non-compliance by distributors or dealers positioning themselves as our authorised partners; (iv) adverse media coverage or unfavorable social-media commentary, including by influencers and public figures not directly engaged by us; and (v) actual or perceived breaches of customer data privacy or cyber-security incidents. Any of these events could erode customer confidence in our brands, diminish brand value and adversely affect our sales volumes.

We have put in place internal policies and conduct quality checks to protect our brand image. While we have not face such instances in the last 3 Fiscals, there can be no assurance that such measures will be effective at all times. Allegations of product defects, product recalls, negative publicity concerning our brands or associated individuals, or other reputational events may still occur and could materially and adversely impact our reputation, business operations, cash flows, financial condition and results of operations.

5. We generally do business with our customers on purchase order basis and do not enter into long term contracts with them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.

Our business is dependent on our continuing relationships with our customers. Our Company neither have any long-term contract with any of customers nor have any marketing tie up for our products. Any change in the buying pattern of our customers can adversely affect the business of our Company. The loss of or interruption of work by, a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. We believe we have maintained good and long-term relationships with our customers. However, there can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, including if we are not able to deliver our products on a timely basis or offer services that meet the needs of the customers, the number of customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

Our top ten customers contribute to a substantial portion of our revenues for for the year ended March 31, 2025, March 31, 2024 and March 31, 2023. The table below sets forth details of revenue generated from our largest customer, top 5 customers and top 10 customers for our products for the Financial Year 2025, 2024 and 2023 of our revenue from operations.

(₹ in Lakhs)

Period	Revenue from Largest Customer (₹ in Lakhs)	% Contribution of largest customer to revenue from operations	Revenue from Top 5 Customers (₹ in Lakhs)	% Contribution of top 5 to revenue from operations	Revenue from Top 10 Customers (₹ in Lakhs)	% Contribution of top 10 to revenue from operations
Fiscal 2025	3916.13	34.05%	7364.1	64.03%	9013.99	78.37%
Fiscal 2024	2468.66	29.85%	5135.39	62.09%	6546.16	79.15%
Fiscal 2023	1267.59	30.06%	2760.33	65.46%	3316.26	78.64%

However, the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. Also, any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

6. *If we fail to acquire new consumers or fail to do so in a cost-effective manner, we may not be able to increase revenue or maintain profitability.*

For the financial years ended March 31, 2023 to March 31, 2025 we have served to more than 200 customers. Our revenue from operations increased from ₹ 4217.14 Lakhs in Financial Year 2023 to ₹ 8271.14 Lakhs in Financial Year 2024, and further to ₹ 11501.34 Lakhs in Financial Year 2025. This growth has been driven, in significant part, by our ability to acquire new customers and deepen relationships with existing customers. However, there can be no assurance that we will be able to maintain these historical growth rates, attract new customers on a continuing basis or at all, or that our existing customers will continue to purchase our products in the same quantities or frequencies as in the past. Maintaining and expanding our customer base requires sustained investments in marketing and promotional activities. For the financial year ended March 31, 2025, our marketing and advertising expenses were ₹ 63.31 Lakhs, representing 0.55 % of our revenue from operations and 0.61 % of our total expenses. These expenditures may increase in the future due to heightened competition for consumer attention and digital traffic, changing consumer preferences, or higher media and promotional costs. If our conversion rates from such investments are lower than anticipated, our customer acquisition costs may become disproportionate to the revenue generated, which could adversely affect our margins and profitability. Further, to retain and grow our consumer base we may need to incur sustained or increased advertising and promotional expenditures or offer incentives and discounts beyond our current expectations. Any marketing initiative that fails to deliver the expected outcome, or a general slowdown in customer acquisition, may adversely affect our business, financial condition, cash flows and results of operations.

7. *Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected. Our business is subject to strikes, work stoppages and/or increased wage demands, as well as other disputes with our employees. Such instances may cause disruptions in our operations, which could materially adversely affect our business, financial condition and results of operations.*

As on August 31, 2025, our Company has employed 141 employees all of whom are on our payrolls. The above includes employees in the top and middle management (including Executive Directors), and also employees who are part of manufacturing unit and office staff. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected. Further, there are instances where we need to hire additional contract labour, either for specialized jobs or during periods of high customer orders. We have not entered into any agreement for hiring additional labourers and thus availability of appropriately unskilled labour cannot be guaranteed. While we have not faced any shortage of labour in last three Fiscal, any failure to hire the appropriate labour may impact the operations and impair our client relations. Further, we may be subject to labour strikes, industrial unrest, slowdowns, and increased wage costs, which may adversely affect our business, financial conditions, cash flows and results of operations. Negative publicity arising from labour unrest could harm our reputation and relationships with key stakeholders, potentially resulting in a loss of business opportunities. While we consider our relationship with our employees to be good and there has been no such instance in the three Fiscals of any disruptions in work due to disputes or other problems with our work force, we could experience disruptions in work due to disputes or other problems with our work force in future, which may adversely affect our ability to perform our business operations.

8. *We are dependent upon few suppliers for the material requirements of our business. Further, we do not have definitive agreements or fixed terms of trade with most of our suppliers. Failure to successfully leverage our relationships with existing suppliers or to identify new suppliers could adversely affect our business operations.*

Our business depends on a limited number of suppliers for key raw materials, absorbent polymers, non-woven fabrics, packaging material, chemicals and adhesives, of our hygiene products. For the year ended March 31, 2025, March 31, 2024 and March 31, 2023 our top 10 suppliers contributed around 86.84 %, 78.05% and 46.01% respectively of our purchases, reflecting a significant concentration in our supply chain. The availability, quality, and timely delivery of these materials are critical to our production processes, and any disruption could adversely impact our ability to meet customer demand.

We do not have long-term agreements or fixed terms of trade with most of our suppliers. While we have maintained a long-term relationship with many of our suppliers and we have been able to negotiate favorable credit terms from them due to increased order sizes and timely payments, we cannot assure you that we shall be

able to maintain such favourable credit terms in future. To mitigate supply risks, we actively monitor supplier performance, maintain buffer inventories, and are exploring relationships with additional suppliers for critical raw materials. We also evaluate alternate sources domestically to reduce reliance on single suppliers and ensure continuity of supply.

Despite these efforts, there can be no assurance that we will be able to maintain our relationships with existing suppliers or successfully identify alternative suppliers on commercially reasonable terms. Any disruption in supply, increase in raw material costs, or inability to procure sufficient quantities of critical materials could lead to production delays, increased costs, inability to meet customer demand, or reduction in product quality. Such outcomes could materially and adversely affect our business, results of operations, financial condition, and cash flows. Further, we are also exposed to fluctuations in the prices of raw material. Thus, we may be unable to control the factors affecting the price at which we procure our raw material. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Particularly, we face the risk of our products becoming unaffordable if pass on the increase in the cost of production to our customers through a corresponding increase in the price of our products in order to maintain our margins. Upward fluctuation of price of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial conditions and results of operations

9. Our net cash flows from operating activities and investing activities have been negative in some years in the past. Any negative cash flow in the future may affect our liquidity and financial condition.

We have, in the past, experienced negative net cash flows in operating activities for FY 2025 and FY 2023 and negative cash flows in investing activities for FY 2025, 2024 and FY 2023. Such negative cash flows from operating activities for FY 2025 were mainly attributable to change in working capital consist of increase in Trade Receivables and for FY 2023 were mainly attributable to change in working capital consist of decrease in Trade payables. Negative cash flows in investing activities for FY 2025, 2024 and FY 2023 were mainly attributable to purchase of fixed assets, purchase of investments and other assets.

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years and which could affect our business and growth:

Particulars	For the financial year ended on March 31,		
	2025	2024	2023
Net cash (used)/from operating activities	(1,036.20)	118.95	(144.85)
Net cash (used)/from investing activities	(23.58)	(573.39)	(34.73)

(₹ In Lakhs)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

10. We generate a substantial portion of revenue from Gujarat. Any adverse developments affecting our operations in the West Bengal could have an adverse impact on our revenue and results of operations

Our revenue from operations is concentrated in the region of Gujarat contributing a substantial portion. For the Fiscal 2025, 2024 and 2023 we derived ₹8,664.60 lakhs, (75.34%), ₹ 5,315.37 lakhs (64.26%) and ₹ 3,764.94 lakhs (89.28%) of revenue from operation, respectively.

Any adverse developments affecting our operations in these states, particularly Gujarat such as changes in state-specific regulations, introduction of new levies, disruptions in logistics networks, political or social unrest, natural calamities, or weakening of economic conditions – could materially disrupt our business activities and supply chains in those regions.

Although we are gradually expanding our operations and customer base across multiple states to diversify our geographical concentration, there can be no assurance that such initiatives will sufficiently reduce our dependence on a few key states. Any material adverse impact on our operations in these states could result in reduced sales, profitability, and market share, and may materially and adversely affect our business, results of operations, financial condition and cash flows.

11. Our business is dependent on our operating facility in Rajkot, Gujarat. The loss or shutdown of our facilities could have a material adverse effect on our business, financial condition and results of operations.

Our facility at Rajkot are subject to operating risks, such as shutdowns due to the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, adequate utilisation rates, obsolescence of equipment, labour disputes, strikes, lockouts, industrial accidents, disruption by extremist groups, or any other reason, and the need to comply with the directives and regulations of the Government of India (“GoI”) and relevant state government authorities. We are heavily reliant on floor workers at our unit, including those workers who are hired on a daily wage / per piece basis and are not on a fixed payroll. Our inability to continue to procure such services or any disputes with this group of labour would severely affect our operations and may cause an under-utilisation of our capacities or a total shut down.

Our operations involve a significant degree of integration, and our results of operations are dependent on the successful operation of each facility. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition, results of operations and prospects may be adversely affected by any disruption of operations at our facilities.

12. We have not yet placed orders in relation to the capital expenditure to be incurred for the proposed purchase of equipment / machineries and construction of manufacturing facility. In the event of any delay in placing the orders, or in the event the vendors are not able to provide the equipment / machineries in a timely manner, or at all, the same may result in time and cost over-runs.

We have not yet placed firm purchase orders for the capital expenditure proposed to be incurred towards the purchase and installation of new equipment and machinery and construction of manufacturing facility. Until such orders are finalised, there remains uncertainty regarding delivery timelines, pricing and specifications of the machinery. Delays may arise on account of prolonged negotiations with suppliers, changes in design or specifications, or due to supply chain constraints affecting vendors. Further, even after orders are placed, we remain exposed to risks such as late delivery, defects in supplied machinery, installation delays, non-availability of skilled personnel for installation, and cost escalations. Any such delays or cost overruns could result in postponement or disruption of our planned capacity expansion and operations, increase our project costs, and consequently have an adverse effect on our business, results of operations, cash flows and financial condition.

13. We are dependent on single contract manufacturer for manufacturing of Diapers, any disruption to our operations on account of contract manufacturer may have an effect on our business, results of operations and financial condition

While we undertake core manufacturing of our hygiene products at our own facilities for sanitary napkins, we also engage third-party job-workers for manufacturing of Diapers. However, this arrangement exposes us to operational risks. For instance, labour shortages, non-compliance with statutory requirements, quality lapses, breakdown of equipment or other disruptions at contract manufacturer premises could delay or affect the quality of our finished products. Delays in finishing operations at contract manufacturer units may result in deferred dispatches of some consignments. While we have not faced such instances in the last three fiscals.

We have sought to mitigate these risks by setting up a manufacturing facility for diaper. For further details please refer to “Objects of the Offer” on page 88. This engagement, is on a non-exclusive and short-term basis without definitive long-term contract. There can be no assurance that our existing contract manufacturer will continue to provide services on a timely and cost-effective basis or that suitable alternatives will be available on similar commercial terms. Any significant disruption or deterioration in our relationship with contract manufacturer, or failure to engage replacements when required, may adversely affect our production schedules, reputation, results of operations, financial condition and cash flows.

14. Volatility or Disruptions in Supply and Pricing of Raw Materials and Outsourced Finished Products Could Adversely Affect Our Business, Cash Flows, Financial Condition and Results of Operations

Our business requires a continuous supply of various raw materials such as absorbent polymers, non-woven fabrics, packaging material, chemicals and adhesives, and also involves procurement of certain finished/semi-finished products from third parties. The availability and pricing of these inputs are subject to fluctuations arising from factors beyond our control, including the quality and availability of supply, changes in consumer demand,

changes in government programs, import duties, regulatory restrictions, global commodity price movements, production levels and transportation costs.

For example, in the past financial years our cost of raw materials consumed represented approximately 41.97 %, 47.21% and 43.14% of our revenues from operations for the Fiscal 2025, Fiscal 2024 and Fiscal 2023, respectively. Any increase in raw material prices could directly impact our cost of goods sold and, while we may increase our selling prices to offset higher costs, such increases may not be proportionate or sustainable in a highly competitive market. This in turn may adversely affect our margins, cash flows and profitability. While we have not faced such raise of price in last three fiscals which had materially impacted our business, there can be no assurance that we may not face in future,

15. Our business relies on third-party transport logistics and storage providers for the timely procurement of raw materials and distribution of finished products, and any disruption or cost increase in such services could adversely affect our operations.

Our Company relies extensively on third-party transportation providers for the procurement of raw materials as well as for the distribution of our finished hygiene products to CSA, and e-commerce fulfilment centre. Any material disruption in the availability of such transportation services, inadequacies in the Indian logistics infrastructure, or continuing increases in transportation costs could adversely impact our supply chain, production schedules and product delivery timelines.

For Fiscals 2025, Fiscals 2024 and Fiscals 2023, our loading, unloading and transport charges aggregated ₹ 213.73, ₹523.51 and ₹168.64, representing 2.07%, 6.68% and 4.01% of our total expenses, respectively. Although freight costs are generally borne by the customer, we may not always be able to fully pass on rising transport costs to customers in a competitive market. In addition, disruptions of transportation services due to strikes, lock-outs, weather-related problems, shortages of vehicles or drivers, or other unforeseen events could delay the receipt of raw materials or the delivery of our products to customers.

We seek to mitigate these risks by engaging multiple logistics partners, maintaining relationships with a range of carriers, and monitoring delivery timelines. However, we remain exposed to transportation risks such as loss or pilferage of goods in transit, delay in deliveries, or service providers' non-compliance with applicable laws. We may be required to replace a service provider if its services do not meet our safety, quality or performance standards or if it should unexpectedly discontinue operations.

While we have not any face such instances in the last three fiscal. There can be no assurance that we will always be able to procure transportation services on cost-effective and timely terms, or at all. Any prolonged disruption or unavailability of such services may result in delays or an inability to deliver our products to customers, or may require us to resort to alternative means of transportation which may not be cost- or time-efficient. Such events could adversely affect our operations, profitability, reputation and market position

As of March 31, 2025, we have partnered with 11 Consignment Selling Agents (CSAs) operating across 11 states. These CSAs facilitate the storage, handling, and distribution of our products within their respective regions. Our arrangements with CSAs are based on mutual understanding. While we are not dependent on any single CSA, any failure by the CSAs to perform their obligations effectively, could result in disruptions to our supply chain, delay in product delivery, and increased logistics costs. Additionally, entering into new arrangements or transitioning operations to alternate service providers may take time and entail additional expenses. Any such disruption could materially and adversely affect our business operations, financial condition, results of operations, and cash flows.

16. Orders placed by our customers may be delayed, modified, cancelled or not fully paid for, which may adversely affect our business, financial condition and results of operations

Our company sells hygiene products through dual channels, including distributors, and e-commerce platforms. We generally do not execute long-term contracts with our customers and supply our products based on purchase orders. As a result, orders placed by customers may be delayed, modified in scope or quantity, cancelled, or not fully paid for, which could affect our production planning and working capital cycle.

Delays or cancellations may occur due to factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorisations or other regulatory approvals on their part, changes

in demand, or logistical difficulties in transportation and warehousing. Since there are no binding long-term contracts, customers can reschedule or cancel orders at short notice, and it is difficult for us to predict with certainty if, when and to what extent we may be able to deliver the orders placed.

In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. We have not face such instances in the past three fiscal which has materially impacted our business operations. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

17. There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies.

Our Company has delayed in complying with certain statutory provisions under Companies Act 2013. Further, as mentioned in below table there were non-compliances and discrepancies in filing with RoC.

As certified by Practicing Company Secretary, Rakhi Dasgupta & Associates vide certificate dated September 28, 2025

Although, as on the date of filing this draft red herring prospectus, our company has maintained appropriate systems and has updated its corporate records such as minutes, statutory forms, registers and documents as required under the companies act, 2013; while there has been no impact on our financial condition or any statutory or regulatory proceedings initiated in this regard as of the date of this prospectus, there can be no assurance that any deficiencies in our internal controls and compliances will not arise, or that the regulator will not initiate proceedings against us or impose penalties on us or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any future deficiencies in a timely manner or at all. Further, to improve our secretarial compliances, to mitigate and ensure the timely compliances we have appointed Sagar Parmar as company secretary and compliance officer.

18. There have been instances of delay or default in payment of statutory dues and filing of statutory returns by our company in the past.

There have been several instances of delay/ default in payment of statutory dues including EPF payments and filing of GST returns by our Company in the past which were not material in nature and the same were regularised subsequently by payments and filing of return with interest and penalty. For the last three Fiscals there has been generally delay in filing returns for Employee Provident Fund, Good and Service Tax due to several reasons as disclosed below:

We cannot assure you that there will be no default or delay in future in payment of such statutory dues. Further, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by respective statutory authorities on account of such delay in payments or filing of returns, which may adversely affect our business, financial condition, and reputation.

19. We rely on our relationships with certain marketplaces and web traffic drivers for sales through our online channel.

As part of our online sales channels, we sell our products through our direct-to-business channel such as Amazon, Flipkart, Meesho, Snapdeal, Jiomart. For the Fiscal 2025, Fiscal 2024 and Fiscal 2023 our revenue from online channels amounted to ₹ 687.76 Lakhs, ₹ 419.90 Lakhs and ₹ 136.92 Lakhs representing 5.98% %, 5.08% and 3.25% of our revenue from operations, respectively. Online market places could also change their business practices or seek to modify their contractual terms, such as payment terms. While we have not faced such instances in the last three Fiscal. Further, such entities may also increase the cost of their services, due to inflationary pressures or other reasons, which may adversely impact our expenses and profitability.

20. Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, financial condition, results of operations and cash flows.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and trade inventory accordingly. If our management misjudges expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory, we may be required to dispose of our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows.

We estimate our sales based on the forecast, demand and requirements and also on the customer specifications. Natural disasters such as earthquakes, extreme climatic or weather conditions such as floods or droughts may adversely impact the supply of our products and local transportation. Should our supply of our products be disrupted, we may not be able to procure an alternate source of supply in time to meet the demands of our customers. Such disruption to supply would materially and adversely affect our business, profitability and reputation.

The following table sets forth details on our inventory levels, as per our restated financial information, as of and for the years indicated:

Particulars	Fiscal 2025	Fiscal 2024	Fiscal 2023
Inventory (₹ in Lakhs)	2,588.79	3,232.64	1,567.65
Inventory holding days	92	106	112

In the past we have not experienced any instances of disruptions to the delivery of product to our customer for reasons such as poor handling or transportation bottlenecks which could have led to delayed or lost deliveries or damaged products and disrupted supply of these products, but there is no guarantee that these instances will not happen in future. To improve our line capability, we try to stock our inventory. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively. If we overstock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operations.

21. We may be subject to unfair competitive or trade practices, which could harm our brands, reduce our sales and adversely affect our business, financial condition, cash flows and results of operations.

We operate in markets where our products and packaging are visible to a large number of consumers and competitors. Consequently, we are exposed to risks from various unfair trade practices, including the manufacture and sale of counterfeit, cloned, look-alike and pass-off products. Counterfeit or cloned products are produced and sold illegally as if they were our own, while look-alike or pass-off products are manufactured and packaged to resemble our products, thereby misleading consumers. Such imitation can extend to brand names, packaging, colour schemes, trade dress and other distinctive features that identify our products in the market.

In the past, we have not experienced incidents of such practices. The presence and sale of counterfeit, cloned or pass-off products may not only divert sales away from our genuine products but also create heightened reputation risk for us. Such products are often sold at lower prices and may be of inferior quality, potentially harming consumers and eroding trust in our brands. In addition, our management time and resources may be diverted to pursue claims, complaints or litigation against such practices. We cannot assure you that we will be able to detect, prevent or adequately address all instances of counterfeit or infringing products in a timely or cost-effective manner. Any failure to do so could adversely affect our brand equity, customer confidence, revenues, financial condition, cash flows and results of operations.

22. Under-utilization of our currently operational production lines at our manufacturing facility and an inability to effectively utilize our expanded manufacturing capacities could have an adverse effect on our business, future prospects, and future financial performance.

Our ability to maintain our profitability depends on our ability to optimise our process of production. In particular, the level of our capacity utilization can impact our operating results. In the event we face disruptions at our manufacturing facility including as a result of labour unrest, unexpected events or temporary schedule maintenance or inability to procure sufficient raw materials could result in operational inefficiencies which could impact our actual production and capacity utilisation and eventually our sales. Such disruption would have a material effect on our business and financial condition. While there have been no instances of under-utilization of

our capacities in the Fiscal2025, Fiscal 2024, and Fiscal 2023, there can be no assurance that such instances will not occur in future which may have an adverse impact on our business, results of operations and financial condition. Set out below are the details of our installed capacity, actual production and capacity utilisation for the years indicated below:

Manufacturing Facilities	FY 2024-25			FY 2023-24			FY-2022-23

Our Company proposes to augment our manufacturing capacity by undertaking brownfield expansion to capitalise on anticipated growth in our industry. There can be no assurance that the proposed expansion will result in an immediate increase in our revenue from operation or at all. Underutilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, or an inability to fully realize the benefits of our proposed capacity expansion, could adversely impact our business, growth prospects and future financial performance.

23. Any IT system failures or lapses on part of any of our employees may lead to operational interruption, liabilities or reputational harm.

The success of our businesses depends in part upon our ability to effectively deploy, implement and use information technology systems and advanced technology initiatives in a cost effective and timely basis. Our computer networks may be vulnerable to unauthorised access, computer hacking, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by our employees, subcontractors or third-party vendors. While we have not faced any such failure in the past three fiscals, any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

24. We may not be able to prevent unauthorised use of trademarks obtained or applied for by third parties, which may lead to the dilution of our goodwill.

We have obtained trademark registrations of our brands under the trade marks act, 1999 (“Trade Marks Act”), any unauthorised use of our trademarks, by unrelated third parties may damage our reputation and brand. Preventing trademark infringement, particularly in India, is difficult, costly and time-consuming. The measures

we take to protect our trademarks may not be adequate to prevent unauthorised use by third parties, which may affect our brand and in turn adversely affect our business, financial condition, results of operations and prospects.

Further, we cannot assure you that any application for registration of our trademark in future by our company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorised use or take appropriate and timely steps to enforce or protect our intellectual property. For further details please refer to chapter titled “**Government and Other Approvals**” beginning on page 245 of this draft red herring prospectus.

25. Our financing agreements contain covenants that limit our flexibility in operating our business. our inability to meet our obligations, including financial and other covenants under our debt financing arrangements could adversely affect our business, results of operations and financial condition

As on August 31, 2025, our total outstanding indebtedness was ₹ 1987.52 which includes secured and unsecured borrowings. for details on our borrowings, please refer to chapter titled “**Financial Indebtedness**” beginning from page 224 of this Draft Red Herring Prospectus. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our businesses. further, our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions, any of which could adversely affect our business and financial condition. We are required to obtain prior approval from our lenders for, among other things, but not limited to effecting any change in the management/board of the company, declaration of dividend, capital structure of the company; undertake any new project, implement any scheme of expansion or acquire fixed assets, enter into borrowing arrangement either secured or unsecured with any other bank/financial institution/company or otherwise, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc. We have applied to our lenders for No Objection Certificate (NOC) for our proposed initial public offer, for which their NOC is received.

Additionally, our financing agreements are secured by our movable, immovable or intangible assets (whether existing or future), goods and work-in-progress (whether existing or future) and by personal guarantees of our promoter. such financing agreements enable the lenders to cancel any outstanding commitments, accelerate the repayment, exercise cross default provisions and enforce their security interests on the occurrence of events of default such as a breach of financial covenants, failure to obtain the proper consents, failure to perfect security as specified and such other covenants that are not cured. It is possible that we may not have sufficient funds upon such an acceleration of our financial obligations to pay the principal amount and interest in full. Further, if we are forced to issue additional equity to the lenders, ownership interest of the existing shareholders in our company will be diluted. It is also possible that future financing agreements may contain similar or more onerous covenants and may also result in higher interest cost. if any of these events were to occur, our business, results of operations and financial condition may be adversely affected.

26. We do not have a formal hedging policy and accordingly, face foreign exchange risks that could adversely affect our results of operations and cash flows.

We have foreign currency payables for procurement of products and costs incurred during our export sales business operations and during our receivables, trade payables, borrowings and other payables, and are therefore exposed to foreign exchange risk between the Indian Rupee, and U.S. dollars or any other foreign currency. Any significant fluctuation in the value of the Indian Rupee as noticed recently in the case of the US Dollar, may adversely affect our results of operations. As of the date of this Draft Red Herring Prospectus, our Company does not have a formal hedging policy.

27. Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.

We believe that the insurance coverage maintained, would reasonably cover all normal risks associated with the operation of our business, however, there can be no assurance that any claim under the insurance policies maintained by us will be met fully, in part or on time. In the event, we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at

all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected. As of August 31, 2025, Our Insured Assets was ₹ 3774.99 Lakhs and our insurance cover as a percentage of the total Insurable Assets of our Company was 97.00 %. For more details, please refer to the chapter titled **“Our Business”** on page 130 of this Draft Red Herring Prospectus.

28. If any new products or brands that we launch are not as successful as we anticipate, our business, results of operations and financial condition may be adversely affected.

We currently operate under a brand Femiss, Womanica, ElderFit and Bloom Baby but intend to expand our product portfolio. We may launch additional brands in the future in order to effectively market a wider range of apparel or other products. However, we cannot assure you that any new products or brands we launch will be successful or find traction with our customers or retail partners, or that we will be able to recover costs we incurred in developing such products and brands. If the products and brands that we launch are not as successful as we anticipate, our brand equity may suffer and our business, results of operations and financial condition may be adversely affected. Further, such expanded product offerings place a strain on our management, operational and financial resources, as well as our information systems. For an instance, we have stopped the sale of cotton balls and swabs due to less demand and low margin product.

29. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew, from time to time, certain approvals, licenses, registrations and permits under central, state and local government rules in India, generally for carrying out our business and for our manufacturing facilities. Some of these approvals are granted for a limited duration. While we are required to obtain a number of approvals for legally conducting our business operations and we shall submit the applications for renewal of such approvals, as and when required, during the course of our business operations, we cannot assure you that we will be able to obtain approvals in respect of such applications, or any application made by us in the future. If we fail to obtain such registrations and licenses or renewals, in a timely manner, we may not then be able to carry on certain operations of our business, which may have an adverse effect on our business, financial condition and results of operations. For details, see **“Government and other Approvals”** on page 240 of this Draft Red Herring Prospectus.

We have submitted certain applications to various regulatory authorities seeking approvals and licenses. For details, please refer ‘Pending Approvals’ under the section titled **“Government and other Approvals”** of this Draft Red Herring Prospectus. There can be no assurance that the relevant authorities will issue such permits or approvals to us or that they will be issued on time. Further, these permits, licenses and approvals are subject to several conditions and we cannot assure you that we will be able to continuously meet the conditions, which may lead to cancellation, revocation or suspension of relevant permits/licenses/approvals.

30. We have contingent liabilities, and our financial condition could be adversely affected if any of these contingent liabilities materializes.

As on March 31, 2025, we had Contingent Liability of Rs. 13.32 Lakhs for which no provision had been made. In the event that any of these contingent liabilities materialize, our results of operation and financial condition may be adversely affected. Details of Contingent Liabilities and commitments are as follows:

31. Unsecured loans taken by our Company can be recalled by the lenders at any time.

Our Company has currently availed unsecured loans from certain lenders. As on August 31, 2025, we had outstanding unsecured loan of ₹ 539.15 Lakhs. These loans may be recalled by the lenders at any time. In the event that, any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company’s liquidity. If we are unable to procure such financing, we may not have adequate working capital to maintain the desired inventory level. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, see "**Financial Indebtedness**" on page 224 of this Draft Red Herring Prospectus.

32. Any failure in our quality control processes may have an adverse effect on our business, results of operations and financial condition.

Our facility holds certifications including ISO 9001:2015 and WHO-GMP certified and also holds a BIS certification. Our products may contain quality issues or undetected errors or defects, especially when first introduced or when new products are developed, resulting from the design or manufacture of the product or raw materials used in the product. We experience sales returns regularly in our normal course of business. We have implemented quality control processes and regularly conduct inspections of raw materials sourced from suppliers, contract manufacturer and finished products manufactured by us based on our internal quality standards. However, we cannot assure you that our quality control processes will not fail or the quality tests and inspections conducted by us will be accurate at all times. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality assurance procedures, negligence, human error or otherwise, may damage our products, quality certificate and result in deficient products.

33. Our inability to effectively manage our growth or to successfully implement our business plan and growth strategies could have an adverse effect on our business, results of operations and financial condition. The success of our business will depend greatly on our ability to effectively implement our business and growth strategies.

Our growth strategies require us to develop and strengthen relationships with existing customers for our business who may drive high volume orders on an ongoing basis. To remain competitive, we seek to increase our business from existing customers and by adding new customers, as well as expanding into new geographical markets.

Our success in implementing our growth strategies may be affected by:

- our ability to maintain the quality of our products
- our ability to increase our geographic presence;
- the general condition of the global economy (particularly of India and the other markets that we currently or may operate in);
- our ability to compete effectively with existing and future competitors,
- changes in the Indian or international regulatory environment applicable to us.

Many of these factors are beyond our control and there is no assurance that we will succeed in implementing our strategies. While we have successfully executed our business strategies in the past, there can be no assurance that we will be able to execute our strategies on time and within our estimated budget, or that our expansion and development plans will increase our profitability.

Any of these factors could adversely impact our results of operations. We expect our growth strategies to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and growth strategies could have a material adverse effect on our business, financial condition and profitability.

34. ***If we are subject to any fraud, theft, or embezzlement by our employees or contract manufacturer, it could adversely affect our reputation, results of operations and financial condition. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Our business and the industry we operate in is subject to incidents of vendor/ dealer/ employee fraud, theft, or embezzlement. While there have been no certain instances where our employees have engaged in pilferage of our products. Although we have set up various security measures such as deployment of supervisor and operational processes such as periodic stock taking and have obtained relevant insurance in relation to the same, and are also entitled to recover shortages from our employees, there can be no assurance that we will not experience any fraud, theft, employee negligence, loss in transit or similar incidents in the future or be able to successfully claim under such insurance policies on the occurrence of any such events, which could adversely affect our reputation, results of operations and financial condition.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

35. ***Any failure or significant weakness of our internal controls system could cause operational errors or incidents of fraud, which would adversely affect our profitability and reputation***

As we continue to expand, our success depends on our ability to effectively utilise our resources and maintain internal controls. We may need to modify and improve our financial and management control processes, and other internal controls and compliance procedures to meet our evolving business needs. If we are unable to improve our controls, systems and procedures, they may become ineffective and adversely affect our ability to manage our operations which may adversely affect our business operations. Our efforts in improving our internal control systems may not result in eliminating all risks. While there have been no instances of failure of internal controls which have had a material adverse effect on our business, in Fiscal 2025, Fiscal 2024, and Fiscal 2023, if we are not successful in discovering and eliminating weaknesses in our internal controls, our ability to manage our business effectively may materially and adversely be affected.

36. ***The determination of the Price Band is based on various factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer.***

The determination of the Price Band is based on various factors and assumptions, and will be determined by us in consultation with the Lead Managers. Furthermore, the Offer Price of the Equity Shares will be determined by us in consultation with the Lead Managers through the Book Building Process. These will be based on numerous factors, including factors as described under “***Basis for Offer Price***” beginning on page 101 and may not be indicative of the market price for the Equity Shares after the Offer.

In addition to the above, the current market price of securities listed pursuant to certain previous initial public offerings managed by the Lead Managers is below their respective issue price. For further details, see “***Other Regulatory and Statutory Disclosures – Price information of past issues handled by the Lead Managers***” on page 263. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, our financial performance and results post-listing, and other factors beyond our control. We cannot assure you that an active market will develop or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

37. ***We have in the past entered into related party transactions and may continue to do so in the future.***

Our Company have entered into certain related party transactions with our Promoters, members of the promoter group, Directors and Our Group Company in the past which are in compliance with applicable provisions of

Companies Act, 2013 and all other applicable laws. During Fiscal 2025 we had transaction of 13.25% of revenue from operations with our related party for sale of product and about 58% of purchases from R.P. Hygiene LLP. Such purchase of product from R.P Hygiene LLP is on arm's length and we had entered into an exclusive production agreement.

For details, please see "Annexure - IX: Statement of Related Parties & Transactions" under the chapter titled "Restated Financial Statements" beginning on page 180 of this Draft Red Herring Prospectus. While our Company believes that all such transactions have been conducted on the arm's length basis and in compliance of the Companies Act, 2013, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain party transactions and our undertakes that such related party transactions shall not be done against the interests of the Company and its shareholders as prescribed in the SEBI LODR Regulations. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations

38. *Our funding requirements and the proposed deployment of Net Proceeds are not appraised by any independent agency, which may affect our business and results of operations.*

We intend to use the Net Proceeds for the purposes described in 'Objects of the Offer' on page 88 of this Draft Red Herring Prospectus. Our funding requirements are based on management estimates and our current business plans and has not been appraised by any bank or financial institution. The deployment of the Net Proceeds will be at the discretion of our Board. We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, inability to identify suitable location for our stores at favourable terms and other financial and operational factors. Accordingly, prospective investors in the Offer will need to rely upon our management judgement with respect to the use of proceeds. If we are unable to deploy the proceeds of the Offer in a timely or an efficient manner, it may affect our business and results of operations.

39. *There may be potential conflicts of interest if our Promoters or Directors get involved in any business activities that compete with or are in the same line of activity as our business operations.*

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoters who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoters are unable or unwilling to continue in his present position, we may not be able to replace them easily or at all. Our Promoters, have over the years-built relations with various customers and other persons who are form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected. Our Promoter Group entity, R. P Hygiene LLP is in same line of business, however, our Company has entered into an exclusive production agreement.

40. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, our Key Managerial Personnel and Senior Management as well as our ability to attract and retain personnel with technical expertise. Any loss of our Promoter, Directors, Key Managerial Personnel, Senior Management or our ability to attract and retain them and other personnel with technical expertise could adversely affect our business, financial condition and results of operations.*

Our success largely depends upon the knowledge and experience of our Promoters, Directors, Key Managerial Personnel and Senior Management as well as our ability to attract and retain skilled personnel. Any loss of our Promoter, Directors, Key Managerial Personnel and Senior Management or our ability to attract and retain them and other skilled personnel could adversely affect our business, financial condition and results of operations. We depend on the management skills and guidance of our Promoter for development of business strategies, monitoring their successful implementation and meeting future challenges. Further, we also significantly depend on the expertise, experience and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will depend largely on our ability to retain the continued service of our management team. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in his or her

present position, it could be difficult for us to find a suitable or timely replacement and our business, financial condition and results of operations could be adversely affected.

In addition, we may require a long period of time to hire and train replacement personnel when personnel with technical expertise terminate their employment with us. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining personnel with technical expertise that our business requires. The loss of the services of such persons could have an adverse effect on our business, results of operations, cash flows and financial condition.

There is significant competition for management and other skilled personnel in our industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives and other perquisites to such skilled personnel. If we are not able to attract and retain talented employees as required for conducting our business, or if we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and results of operations may be adversely affected. For further information, see “*Our Management*” on page 160 of this Draft Red Herring Prospectus.

For further information, see “*Capital Structure*” and “*Our Management*” on pages 72 and 160, respectively, of this Draft Red Herring Prospectus.

43. None of our Directors possess experience of being on the board of any listed company.

None of our Directors possess experience of being on the board of any listed company and accordingly, may not be adequately well-versed with the activities or industry practices undertaken by the listed company. We cannot assure you that this lack of adequate experience will not have any adverse impact on the management and operations of our Company. Further, our Company will also be subject to compliance requirements under the SEBI Listing Regulations and other applicable law post listing of the Equity Share on the Stock Exchanges. Our Board is capable of efficiently managing such compliance requirements including by engaging professionals having expertise in managing such compliances.

- 46. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the ‘Objects of the Offer’.***

Any shortfall in raising / meeting the same could adversely affect our growth plans, operations, and financial performance. As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Offer. We meet our capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “Objects of the Offer” beginning on page no. 88 of this Draft Red Herring Prospectus.

- 47. *There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.***

As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of monitoring agency is required only for Offer size above Rs. 5000 Lakhs. Since this Offer Size is less than Rs. 5000 Lakhs, our Company has not appointed any monitoring agency for this Offer. Further, our Company shall inform about material deviations in the utilization of Offer proceeds to the BSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

- 48. *The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.***

An outbreak of COVID-19 was recognized as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Since May 2020 many of these measures have been lifted. We proactively engaged with our clients to reassure them and to demonstrate our commitment to restart our operations and to build confidence in the safety protocols deployed at our stores. Further, the lockdown was again imposed by the government in some parts of India during April 2021, which was partially relaxed in June 2021, during this period of lockdown and relaxation, our stores

were partially operational. If we do not respond appropriately to the pandemic, or if customers did not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future.

We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition and results of operations. There are numerous uncertainties associated with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus' impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

49. *Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders' approval.*

Our Company intends to deploy and utilize Net Proceeds raised pursuant to the Initial Public Offer in the manner set out in the section titled “*Objects of the Offer*” on page 88 in the Draft Red Herring Prospectus. In accordance with SEBI LODR Regulations and other applicable provisions, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations and it may also lead to delay in deployment of funds as per the schedule of implementation as disclosed in objects section titled “*Objects of the Offer*” on page 88 in the Draft Red Herring Prospectus. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by redeploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

50. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

EXTERNAL RISK FACTORS

44. *Changes in Government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

45. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;

- Goods and Service Tax

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

46. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

47. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Prospectus.

While facts and other statistics in the Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 111 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

48. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

49. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

50. The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.

India’s physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility

could disrupt our Company normal business activity. Any deterioration of India physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

51. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

52. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

53. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS

54. Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Offer, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.

After the completion of our Initial Public Offer, our Promoters, along with our Promoter Group members, will hold, approximately [●] % of our post offer paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company's or your best interests. For further details, please refer to the chapters titled "*Capital Structure*" and "*Our Promoter and Promoter Group*", beginning on page 72 and 172 respectively, of this Draft Red Herring Prospectus.

55. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on

shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 179 of this Draft Red Herring Prospectus.

56. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

57. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Offer, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

58. Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares. Capital gains arising from the sale of our Equity Shares are generally taxable in India. Any gain realized on the sale of our Equity Shares on a stock exchange held for more than 12 months is subject to long term capital gains tax in India. A securities transaction tax (“STT”) will be levied on and collected by an Indian stock exchange on which our Equity Shares are sold. Any gain realized on the sale of our Equity Shares held for more than 12 months by an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to long-term capital gains tax in India. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less that are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to short-term capital gains tax at a higher rate compared to the transaction where STT has been paid in India. Capital gains arising from the sale of our Equity Shares will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident. As a result, subject to any relief available under an applicable tax treaty or under the laws of their own jurisdictions, residents of other countries may be liable for tax in India, as well as in their own jurisdictions on gains arising from a sale of our Equity Shares. Further, the Government of India announced the union budget for Fiscal 2026, following which the Finance Bill, 2025 (“Finance Bill”) was introduced in the Lok Sabha on February 1, 2025.

Investors are advised to consult their own tax advisers and to carefully consider the potential tax consequences of owning, investing or trading in the Equity Shares. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time-consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future. Additionally, the Union Cabinet, Government of India has recently approved the Income Tax Bill, 2025, which inter alia, proposes to amend the income tax regime and replace the Income Tax Act, 1961. There is no certainty on the impact of the Income Tax Bill, 2025, once enacted, on tax laws or other regulations, which may adversely affect our business, financial condition, results of operations or on the industry in which we operate. Pursuant to amendments notified by the Finance Act (No.2) Act, 2024 (“Finance Act 2024 II”), long-term capital gains exceeding the exempted limit of ₹125,000 arising from the sale of listed equity shares on the stock exchange are subject to tax at the rate of 12.5% (plus applicable surcharge and cess), without benefit of indexation. Further, any capital gains realised on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short-term capital gains tax at the rate of 20% (plus applicable surcharges and cess) for transfers taking place after July 23, 2024. An STT will be levied both at the time of transfer and acquisition of equity shares (unless exempted) and such STT is collected by an Indian stock exchange on which our Equity Shares are sold. The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision

under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

The Finance Act, 2020, has, inter alia, amended the tax regime, including a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, and that such dividends are likely to be subject to tax deduction at source. Further, pursuant to the Finance Act 2024 II, any payment received by the shareholders from the Company pursuant to buyback of shares undertaken after October 1, 2024 on account of buy back of shares shall be taxable as dividend and no deduction from such dividend income shall be allowed. The investors are advised to consult their own tax advisors to understand their tax liability as per the laws prevailing on the date of disposal of Equity Shares. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning, investing or trading in our Equity Shares. Unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations, governing our business and operations could result in us being deemed to be in contravention of such laws requiring us to apply for additional approvals.

59. There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the BSE SME in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE SME. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

60. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Offer, there has been no public market for our Equity Shares. [•] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Offer due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Offer, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Offer. For further details of the obligations and limitations of Market Makers, please refer to the section titled "General Information – Details of the Market Making Arrangement for this Offer" on page 69 of this Draft Red Herring Prospectus.

61. Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.

There has been no public market for our Equity Shares prior to the Offer. The price may not necessarily be indicative of the market price of our Equity Shares after the Offer is completed. You may not be able to re-sell your Equity Shares at or above the Offer price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on the SME Platform of BSE Limited after the Offer, but there can be no assurance that active trading in our Equity Shares will develop after the Offer, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Offer will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;

- The history of and prospects for our business;
- An assessment of our management, our past and present operations, and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;
- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

Illustration of the Book Building and Price Discovery Process:

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. Details of Use of Offer Proceeds:

1. Setting up a new manufacturing facility at Rajkot in Gujarat ("Proposed facility Unit 2")

We propose to finance the capital expenditure requirements for a setting up a new manufacturing facility in proximity to our facility at Rajkot, Gujarat for manufacturing of diapers. Our existing Unit is located at Survey No.125/P2/P2, Plot no. 1 to 3, Village: Lothada, Rajkot, Gujarat – 360002, India has the capacity utilisation of average 85% of our installed capacity for the Fiscal 2025. Further, we propose to set up Unit 2 on a land acquired by us on leasehold basis from Nagjibhai Ranchhodbhai Sheradiya for a period of 20 years admeasuring 4,672.58 square Mtr situated at Survey No. 483, Plot No. 9/1,9/2 and 10 to 17, Shreenathji Ind. 3 Part- A, At. Padavala, Ta. Kotda Sa, Shreenathji Ind. 3 Part-A, Padavala – 360024 Rajkot, Gujarat pursuant to lease deed dated July 24, 2025.

Over the years, we have invested in expanding and upgrading our Manufacturing Unit. During the Fiscals 2025, 2024, 2023, we have added Property, Plant and Equipment of ₹ 34.68 Lakhs, ₹ 565.23 Lakhs and ₹ 32.06 Lakhs, respectively. In a strategic move to capitalise on the growing demand in the Indian Hygiene Market, our Company has enhanced the capability of existing manufacturing unit by adding fresh capacity of 8 Crore pieces annually in March 2024. Thereby, increasing the current installed capacity of our Manufacturing Facility by 6.83 Crore pieces annually.

In April 2025, we have launched our baby diapers under the brand name “Baby Bloom”, which marked the beginning of our journey in this sector. To efficiently meet initial market demand, we have engaged a contract manufacturer for our baby diaper production, allowing us to maintain quality standards while focusing on building our brand presence. As on March 31, 2025, we have sold 2,75,880 pieces of baby diapers. In 2024, Baby Diapers dominated the India Hygiene Product Market with a share of 48.86%. With the baby diaper industry witnessing consistent growth driven by rising birth rates, increased awareness of hygiene, and higher disposable incomes, the market potential is expanding rapidly. (Source: Credence Research Report) To strategically capture this opportunity, our Company is establishing its own baby diaper manufacturing unit. By setting up in-house production instead of relying on contract manufacturers, we aim to significantly reduce costs, maintain control over product quality, and ensure faster scalability. This approach will not only enhance profitability but also strengthen our position as a reliable and competitive player in the baby care segment. Our proposed manufacturing unit is being designed in line with WHO-GMP norms. Compliance with these standards will allow us to manufacture products that meet the stringent quality, safety, and regulatory requirements prescribed for global markets with an installed capacity of 6 Crore pieces annually.

INDIA’S MACROECONOMIC OVERVIEW

Source: Credence Research Report

In 2024, Baby Diapers dominated the India Hygiene Product Market with a share of 48.86%. This is driven by increasing parental awareness, rising disposable incomes, and a shift toward convenient hygiene solutions, particularly in urban and semi-urban areas. Additionally, expanding product availability through modern retail and e-commerce channels, along with innovations such as rashfree, biodegradable, and ultra-absorbent diapers, have enhanced consumer preference. The continued rise of nuclear families and working mothers has further strengthened diaper usage across the country. Moreover, Sanitary napkins accounted for 32.53% of the market, reflecting their growing adoption across both rural and urban areas. The segment has benefitted from strong awareness campaigns, government programs, and NGO efforts to promote menstrual hygiene. Sanitary napkins remain the most accessible and familiar product for menstruation management, though competition from sustainable alternatives like menstrual cups and reusable pads is slowly gaining traction.

In 2018, the India Hygiene Product Market was valued at USD 1,609.04 million, which grew to USD 2,258.30 million in 2024, reflecting a CAGR of 7.43% during this period. The market's expansion was driven by rising consumer awareness of personal hygiene, increasing disposable incomes, and supportive government initiatives focused on sanitation and menstrual health. A shift in consumer behavior, especially post-pandemic, reinforced the demand for modern hygiene products such as diapers, sanitary pads, wipes, and tampons and menstrual cups, etc. Looking ahead, the market is projected to expand further, reaching USD 3,463.86 million by 2030. Key growth factors include improved access in rural regions, expanding e-commerce penetration, and rising demand for sustainable and eco-conscious hygiene alternatives. Increasing participation of women in the workforce, evolving lifestyles, and a growing elderly population are also boosting demand across various product categories.

Foundations of Change – Market Overview

The India hygiene product market is experiencing robust growth across categories like baby diapers, adult diapers, sanitary pads, wipes, cotton swabs, tampons and menstrual cups, driven by rising health awareness, urbanization, and improved access to affordable hygiene solutions. Increased disposable incomes, growing female workforce participation, and a shift in cultural attitudes have fueled demand, particularly for feminine hygiene products such as sanitary pads, tampons and menstrual cups, where both premium and eco-friendly options are gaining traction. Government initiatives like menstrual hygiene schemes and subsidized product distribution are further boosting rural adoption.

Segments such as baby and adult diapers are expanding rapidly, supported by higher birth rates, aging population, and growing acceptance of incontinence care. Wipes and cotton swabs, though smaller segments, have seen steady demand, especially post-COVID, as consumers prioritize cleanliness and convenience. The rise of D2C brands, improved e-commerce penetration, and regulatory measures like BIS certification for sanitary products are reshaping the market toward quality, safety, and innovation. Regulatory frameworks from bodies like the Bureau of Indian Standards (BIS) are also beginning to enforce quality control more strictly across hygiene categories, especially for items like sanitary napkins and diapers. Overall, India's hygiene product market is evolving into a more organized, inclusive, and opportunity-rich sector.

Government Initiatives and Policy Support:

Paving the Way for Inclusive Hygiene Access Across Menstrual Health and Baby Diaper Markets

The Indian government has played a crucial role in transforming the hygiene product market through a series of targeted initiatives and policies designed to improve public health and promote hygiene awareness across the country. One of the most notable programs is the Menstrual Hygiene Scheme (MHS), launched with the objective of providing affordable and accessible sanitary napkins to adolescent girls in schools, particularly in rural and underserved regions. This scheme not only addresses the direct need for menstrual products but also works to improve menstrual health education, thereby reducing stigma and encouraging school attendance among girls. By subsidizing the cost of sanitary pads, the government has made menstrual hygiene more attainable for millions of young women who might otherwise forgo these essential products due to financial constraints.

Building on this foundation, the government introduced the Suvidha brand of sanitary pads, priced at just ₹1 per pad, which has been a significant step towards making menstrual hygiene products affordable on a mass scale. This initiative has particularly benefited rural communities where awareness and access have traditionally been low. The low price point ensures that cost is not a barrier to proper menstrual care, fostering a healthier and more inclusive environment for women and girls across the country. The wide availability of such low-cost sanitary products has played an important role in bridging the urban-rural hygiene gap and empowering women through improved health outcomes.

In addition to menstrual hygiene, government efforts have also begun addressing the hygiene needs of infants by promoting awareness around baby diaper usage and sanitation practices. Although not as heavily subsidized as menstrual products, increasing public health campaigns emphasize the importance of clean and safe diapering to reduce infant infections and skin diseases, particularly in rural and semi-urban areas. Programs focusing on maternal and child health often include hygiene education that encourages caregivers to adopt disposable or cloth diapers that are hygienic and safe. The government’s indirect role in facilitating access to affordable baby diapers through improved supply chain support and partnerships with manufacturers has helped stimulate growth in this segment, ensuring that infant hygiene receives greater attention as part of overall public health strategies.

Rising Demand for Sustainable, Eco-friendly Products and Consumer Awareness

In recent years, consumer awareness regarding the environmental and health impacts of hygiene products has increased significantly, prompting a marked shift toward sustainable and eco-friendly alternatives. This growing consciousness is reshaping the hygiene market in India, especially within key segments such as sanitary pads,

baby diapers, wipes, tampons and menstrual cups, where traditional products often rely heavily on plastics and synthetic chemicals that contribute to environmental pollution and pose health concerns. The widespread use of non-biodegradable materials in these products has raised serious questions about their long-term impact on landfills and water systems, accelerating the demand for greener solutions.

Several factors underpin this shift. First, there is rising public awareness of the environmental damage caused by conventional hygiene products, particularly those containing plastic components that take hundreds of years to decompose. Media coverage, social campaigns, and educational efforts by NGOs and government bodies have all contributed to informing consumers about the environmental footprint of their choices. This has led to a growing preference for biodegradable, compostable, and reusable products made from natural materials such as organic cotton, bamboo fibers, banana fibers, and plant-based biopolymers. For example, biodegradable baby diapers made from natural fibers are increasingly preferred by eco-conscious parents who want to reduce their family's carbon footprint, while compostable wipes are gaining traction as a safer alternative to conventional wet wipes that pollute waterways. Secondly, health-conscious consumers are increasingly scrutinizing the chemical composition of hygiene products. Concerns about allergies, skin irritation, and prolonged exposure to synthetic chemicals and fragrances have driven demand for products that are chemical-free and gentle on the skin. Organic and natural materials, free from harmful additives, dyes, and perfumes, are gaining prominence as safer alternatives that provide comfort without compromising health. This focus on "clean" products extends across all hygiene categories, including baby diapers and wipes, where parents are opting for gentler options specifically designed for their children's sensitive skin, such as those with hypoallergenic properties and free from chlorine bleaching.

Channel Expansion & Digital/Direct-to-Consumer (D2C) Growth for Revolutionizing Access, and Consumer Engagement in the Hygiene Products

The expansion of retail channels, particularly through digital platforms, has fundamentally transformed the way hygiene products are accessed and purchased across India. Traditionally dominated by physical retail stores and pharmacies, the hygiene product market has witnessed a rapid shift towards e-commerce and direct-to-consumer (D2C) sales models, significantly enhancing product availability and consumer convenience. Major e-commerce players such as Amazon, Flipkart, and Nykaa, alongside emerging niche platforms, have democratized access to hygiene products, enabling consumers from metropolitan hubs to remote and rural areas to shop with ease. This broader distribution reach has been critical in overcoming geographical barriers and addressing supply chain challenges that historically limited product penetration in less accessible regions.

A key driver in this transformation has been the rise of quick commerce (q-commerce) services, which offer ultra-fast delivery options sometimes within hours, catering to an increasingly convenience-driven consumer base. This immediacy not only enhances customer satisfaction but also builds trust and loyalty, especially for products related to personal health and hygiene where timely availability can be essential. For instance, parents looking for baby diapers or wipes can now order these necessities online and receive them promptly, reducing the risk of running out of crucial supplies. Similarly, menstrual hygiene products are now just a few clicks away, helping eliminate barriers related to privacy, embarrassment, or limited local retail availability.

Complementing the growth of e-commerce is the remarkable surge of Direct-to-Consumer (D2C) brands, which have become game changers in the hygiene product market. Unlike traditional brands that rely heavily on third-party retailers, D2C companies engage directly with their customers, using data-driven strategies to tailor product offerings and marketing efforts. These brands harness the power of digital marketing, social media, and influencer partnerships to build authentic relationships with consumers, especially among younger, urban, and tech-savvy demographics.

Cultural Taboos and Societal Stigma Surrounding Menstruation

Despite growing awareness campaigns and governmental efforts, cultural taboos and societal stigma around menstruation remain deeply entrenched in many parts of India, especially in rural and semi-urban areas. Menstruation is often regarded as a private, shameful, or even taboo subject, making open conversations about menstrual health rare or socially unacceptable. This stigma creates significant barriers for women and girls when it comes to accessing and using feminine hygiene products such as sanitary pads or tampons. The reluctance to discuss menstrual hygiene publicly results in a lack of awareness and perpetuates misinformation regarding the safety, usage, and importance of hygienic menstrual care.

As a consequence, many women and girls resort to unhygienic alternatives such as old cloth, ashes, sand, or leaves during their menstrual cycles. These practices expose them to a higher risk of infections such as reproductive tract infections (RTIs) and urinary tract infections (UTIs). The World Health Organization estimates that poor menstrual hygiene management (MHM) can increase the risk of infections, which may have long-term health implications, including infertility in extreme cases. According to the Tata Institute of Social Sciences, over ~23% of adolescent girls in Maharashtra reported using old cloth or other unhygienic materials instead of sanitary pads due to cost or stigma, highlighting the persistent barriers in adoption.

Efforts to dismantle these taboos require long-term, grassroots interventions focused on menstrual health education. Programs targeting schools, communities, and families are essential to normalize menstruation as a natural biological process and encourage hygienic practices. For example, government initiatives like the Menstrual Hygiene Scheme and campaigns run by NGOs have been instrumental in raising awareness, but the challenge remains vast, especially in conservative regions where deep-rooted beliefs prevail. To create meaningful change, education must be coupled with improved product accessibility, community dialogue, and the involvement of men and boys to foster an inclusive environment.

Limited Access in Rural Areas Due to Infrastructure Challenges

Access to feminine hygiene products in India remains uneven, with rural and remote regions facing significant barriers due to inadequate infrastructure and distribution challenges. While urban centers benefit from well-established retail networks, modern healthcare facilities, and increasing awareness, many rural areas lack the same level of access to essential hygiene products such as sanitary pads, tampons and menstrual cups, baby diapers, and wipes. This disparity is compounded by fragmented supply chains, poor transportation infrastructure, and limited availability of reliable retail outlets.

Furthermore, the challenges of last-mile delivery in geographically difficult areas hinder both traditional retail distribution and e-commerce reach. As a result, consumers in these regions frequently face stockouts or must travel long distances to purchase necessary hygiene items.

The lack of awareness about menstrual hygiene exacerbates the problem. Studies indicate that over 70% of girls in rural India are not informed about menstruation before their first period. This lack of prior knowledge causes confusion, fear, and shame when menstruation begins, often leading to unhygienic practices and poor adoption of sanitary products. Without proper education and support, many girls and women resort to using unhygienic alternatives, which increases the risk of infections and other health issues. This gap in education is a critical barrier to improving menstrual health outcomes in rural communities.

The challenges are not limited to menstrual hygiene alone. Access to baby diapers and related hygiene products is also constrained in rural areas. Many parents rely on cloth diapers or improvised materials due to affordability and availability issues. However, these alternatives often lack the absorbency and skin-friendly properties of modern disposable diapers, increasing the likelihood of skin rashes and infections in infants. Awareness about the benefits of hygienic baby care products remains low, and distribution channels for premium baby diapers are primarily concentrated in urban markets. This urban-rural divide limits market penetration and leaves a large segment of rural consumers underserved.

Environmental Concerns and Disposal Challenges

The increasing consumption of disposable hygiene products, particularly sanitary pads and baby diapers has raised significant environmental concerns in India. Most conventional sanitary products contain plastic components that are non-biodegradable and take up to 500-800 years to decompose. Similarly, disposable baby diapers also contain synthetic materials that contribute heavily to landfill waste. The improper disposal of these products exacerbates the growing problem of environmental pollution, particularly in urban and semi-urban areas where waste management infrastructure is already under strain.

It is estimated that over 121 million menstruating women in India generate approximately 1.8 million tonnes of sanitary waste annually. Of this, only a small fraction is properly collected and treated, with the majority ending up in landfills, open drains, or water bodies. The plastic content in sanitary pads and diapers is a major source of microplastic pollution, which contaminates soil and water and poses risks to human health and wildlife. Additionally, many sanitary products are flushed into toilets or discarded in open areas, clogging sewage systems and creating breeding grounds for disease vectors.

Proper sanitary waste management remains a significant challenge due to inadequate infrastructure and limited awareness. Most municipal bodies lack specialized facilities for treating sanitary waste separately from general waste. Women often dispose of used pads in regular garbage bins, open fields, or water bodies because of the absence of designated disposal systems or due to social stigma around menstrual waste. Studies show that only about 10-15% of Indian households have access to sanitary napkin incinerators or safe disposal mechanisms, leading to widespread environmental contamination. A balanced approach that combines sustainable product development, improved waste management infrastructure, and consumer education is essential to mitigate the environmental impact and ensure long term sustainability in India's hygiene market.

Untapped Horizons – Growth Potential & Opportunities and Strategic Navigation – Industry Frameworks

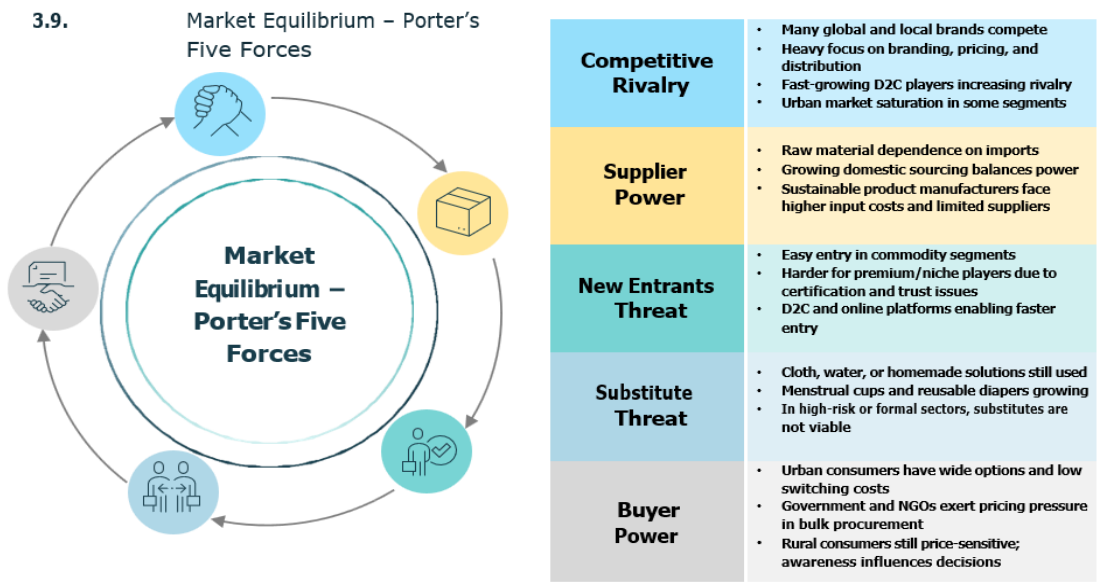

The Indian hygiene product market presents vast untapped growth potential, driven by rising awareness, evolving consumer preferences, and expanding demographic reach. Despite significant progress, a large portion of India's population, particularly in rural and semi-urban regions, remains underserved, creating enormous opportunities for market expansion. Increasing government focus on health and hygiene, coupled with rising disposable incomes and urbanization, is fueling demand for premium and innovative hygiene products across segments like baby diapers, adult diapers, sanitary pads, wipes, cotton swabs, tampons and menstrual cups.

One key opportunity lies in penetrating rural and Tier 2 and Tier 3 cities, where hygiene product adoption is still relatively low due to factors like affordability, lack of awareness, and limited distribution. Tailored product offerings that address affordability without compromising quality, such as low-cost biodegradable sanitary pads or gentle baby wipes can capture these emerging consumer bases. Additionally, increasing literacy and digital penetration enable brands to educate and engage these consumers through digital marketing and e-commerce platforms, making previously inaccessible markets reachable.

The burgeoning Direct-to-Consumer (D2C) model and digital commerce are revolutionizing market dynamics by providing personalized experiences, subscription models, and convenience. This shift enables brands to build direct relationships with consumers, gather real-time feedback, and rapidly innovate products. It also reduces dependency on traditional retail and improves access in remote regions via e-commerce logistics. Collaborations with influencers and social campaigns further amplify brand reach and trust.

Strategically navigating this growth requires a robust industry framework that balances innovation, regulation, and consumer engagement. Industry stakeholders must align with evolving government policies on product safety, biodegradable standards, and sanitary waste management. Compliance with these frameworks not only mitigates legal risks but also builds consumer confidence. Furthermore, partnerships between manufacturers, NGOs, and government programs can facilitate awareness campaigns, improve product distribution, and enhance menstrual hygiene management at the grassroots level.

In summary, the Indian hygiene product industry stands at the cusp of substantial growth fueled by untapped markets, sustainability trends, and digital transformation. Companies that strategically leverage these opportunities—through affordable innovation, sustainable practices, expanded distribution, and strong regulatory compliance—are well positioned to lead the next phase of market expansion and social impact.

Competitive Rivalry – High

The Indian hygiene product market is highly competitive, with both global players like P&G, Unicharm, and Kimberly-Clark, and local brands such as Nobel Hygiene and Redcliffe Hygiene Private Limited vying for market share. Product categories like sanitary pads, diapers, and wipes are saturated with similar offerings, making it hard to differentiate beyond price, comfort, and branding. The rise of D2C brands has further intensified competition, especially in urban areas where brand switching is common due to low switching costs. Innovation in sustainable and organic products, aggressive advertising, and strategic pricing are essential for brands to retain customer loyalty in this crowded space.

Supplier Power – Low to Moderate

Most hygiene products rely on widely available raw materials like SAP, fluff pulp, cotton, and plastic, which limits supplier influence. However, reliance on imports for certain key inputs, especially for high-quality or biodegradable materials, can increase costs and reduce bargaining power. For companies producing eco-friendly products, fewer certified suppliers exist, giving them slightly more leverage. Still, as local sourcing expands under government initiatives, supplier power is expected to decline over time.

Threat of New Entrants – Moderate

Barriers to entry are relatively low in commodity segments like cotton swabs and low-cost sanitary pads. However, entering premium or regulated segments, such as biodegradable products or hospital-grade adult diapers, requires significant investment in R&D, certifications, and trust-building. The D2C model has made it easier for startups to reach customers directly, but establishing consistent product quality and brand credibility remains a challenge.

Threat of Substitutes – Moderate

In lower-income and rural areas, traditional alternatives like cloth, ash, or washable nappies still act as substitutes to modern hygiene products due to affordability or cultural norms. Additionally, reusable products like menstrual cups and cloth diapers are gaining popularity among eco-conscious urban users. However, growing awareness of hygiene-related health risks, combined with government programs promoting modern hygiene products, is slowly reducing the prevalence of these substitutes.

Buyer Power – Moderate to High

Buyer power in the Indian hygiene market is generally moderate but becomes high in certain consumer groups and procurement contexts. On the individual level, especially in urban India, consumers have access to a wide array of brands, formats, and pricing options across both offline and online channels. This choice, combined with

low switching costs, increases buyer power significantly. Consumers, particularly millennial parents, young women, and health-conscious urbanites are becoming more discerning and expect high quality, skin-friendly, and in some cases, environmentally responsible products.

The value chain of the India hygiene product market spans from raw material sourcing to sustainable end-use solutions. Key materials like SAP, fluff pulp, nonwovens, and natural fibers (e.g., bamboo, organic cotton) are sourced both locally and internationally, with growing focus on biodegradable alternatives. Manufacturers use advanced production methods like ultrasonic sealing and precision layering to develop sanitary pads, baby/adult diapers, wipes, tampons and menstrual cups, and swabs that meet BIS and international safety standards.

Demand is driven by diverse consumer segments from infants and women to the elderly and institutional buyers across both rural and urban India. Government schemes, rising awareness, and D2C brands are further expanding access. Sustainability is a growing priority, with companies investing in compostable products, eco-packaging, and waste management innovations to address the massive environmental burden of sanitary and diaper waste.

Political Factors

- Strengthening Health and Sanitation Policies

The Indian government’s focus on improving public health through programs like Swachh Bharat Mission and Menstrual Hygiene Scheme drives demand for hygiene products such as sanitary pads and wipes, especially in rural areas.

- Regulatory Frameworks on Product Safety and Standards

Bureau of Indian Standards (BIS) certifications and Food Safety and Standards Authority of India (FSSAI) regulations ensure product quality and safety, impacting manufacturing and market entry.

- Increased Government Support and Subsidies

Subsidies and incentives under schemes like Make in India and PLI (Production Linked Incentive) encourage domestic manufacturing of hygiene products, reducing import dependence.

Economic Factors

- Growing Middle-Class and Rising Disposable Income

Economic growth and urbanization boost purchasing power, expanding demand for premium and organic hygiene products such as tampons and menstrual cups, baby and adult diapers.

- Cost Sensitivity and Price Competition

While urban consumers may opt for premium products, rural and low-income segments drive demand for affordable sanitary pads and wipes, influencing pricing strategies.

- Raw Material Price Volatility

Fluctuations in the cost of SAP, pulp, nonwoven fabrics, and packaging materials affect manufacturing costs and product pricing.

Social Factors

- Increasing Awareness and Changing Attitudes toward Hygiene

Improved education and campaigns have reduced stigma around menstruation, boosting adoption of sanitary products, tampons, and menstrual cups.

- Demographic Dividend and Urban Migration

A large young population and growing urban workforce increase demand for baby diapers, adult incontinence products, and personal hygiene wipes.

- Cultural Diversity and Regional Preferences

Product customization for regional preferences (e.g., pad thickness, absorbency) is essential to address diverse consumer needs across India.

Technological Factors

- Advances in Material Science and Product Innovation

Development of biodegradable SAP, organic cotton pads, flushable wipes, and reusable menstrual products is gaining traction, catering to eco-conscious consumers.

- Automation and Smart Manufacturing

Modern plants integrate robotics, IoT, and real-time quality control to improve efficiency and product consistency.

- Digital Marketing and E-commerce Expansion

Online platforms enable wider reach, especially for niche and premium hygiene brands, while social media drives awareness and consumer education.

- Rising Focus on Sustainability and Waste Reduction

Growing environmental concerns push manufacturers to develop compostable sanitary products, reusable diapers, and eco-friendly packaging solutions.

- Government Initiatives on Waste Management

Policies encouraging Extended Producer Responsibility (EPR) and sanitary waste segregation are shaping industry practices.

- Challenges of Sanitary Waste Disposal

Large volumes of non-biodegradable waste from hygiene products pose environmental hazards, prompting startups and NGOs to innovate in recycling and composting.

Legal Factors

- Strict Product Quality and Safety Standards

Compliance with BIS standards (e.g., IS 5405 for sanitary pads) and regulations on chemical safety, allergen testing, and labeling is mandatory.

- Liability and Consumer Protection Laws

Manufacturers and sellers face legal consequences for defective or unsafe products, making compliance critical.

- Intellectual Property and Brand Protection

Companies secure patents on innovative product designs and formulations to maintain competitive advantage in a crowded market.

Go-To-Market Strategies

The Indian hygiene market offers significant growth potential, especially in diapers and sanitary pads, as rising disposable incomes, urbanization, and health awareness drive demand.

For **diapers**, urban parents form the premium segment, valuing comfort, safety, and convenience, while semi-urban and rural households represent a large untapped base that can be reached through affordable packs and awareness programs.

For **sanitary pads**, the urban market is evolving toward eco-friendly and premium products, while rural and semi-urban women need accessible, low-cost options supported by education campaigns to break cultural stigma. For instance, initiative adopted by the P&G through Whisper menstrual hygiene education programme, the company reached over 2 crore girls in the last 3 year.

From a Marketing Standpoint

Dual positioning works best: premium, innovation-driven branding for urban consumers, and affordability with education for rural markets. Moreover, affordability & smaller pack sizes for wider reach. Demand is growing for smaller, value-pack SKUs which are more affordable per purchase (even if the cost per unit is higher).

Digital marketing influencers, parenting and women's health content, social media campaigns is effective for urban buyers.

On-ground Activations Anganwadi and ASHA worker outreach, school workshops, community events, and regional media are critical for rural penetration. Hospital partnerships, doctor endorsements, and institutional tie-ups enhance credibility, while collaborations with NGOs and government schemes expand rural access.

Strong marketing opportunities also lie in **subscription models** (monthly packs via e-commerce), trial-based promotions (free samples, low-cost starter packs), and **cause-driven campaigns** that align with women's empowerment and hygiene awareness. Differentiation through **eco-friendly, rash-free, and biodegradable lines** can strengthen brand value among conscious consumers.

Overall, the marketing prospect in India is highly favorable provided brands balance aspirational urban branding with grassroots awareness and affordability strategies to tap into both mature and underpenetrated markets.

Key Consumer Trend Analysis

In India, consumer behavior around hygiene products such as baby diapers, adult diapers, sanitary pads, tampons and menstrual cups and wipes is evolving rapidly. Rising awareness of health and hygiene, especially among younger parents and women, is driving greater acceptance of disposable products over traditional cloth-based alternatives. Baby diapers are increasingly seen as essential in urban households, where working parents prioritize convenience and comfort, while adult diapers are slowly gaining acceptance as conversations around elderly care, post-surgery needs, and incontinence become less stigmatized. For women's hygiene, sanitary pads dominate,

though tampons and menstrual cups remain niche and are mostly adopted in urban, educated segments due to ongoing taboos and limited awareness. Consumers across categories are seeking better quality rash-free, breathable, skin-friendly, and discreet products alongside innovation such as pull-up pants, odor control, and biodegradable or eco-friendly alternatives. At the same time, affordability continues to shape purchase decisions, with smaller, low-cost pack sizes playing a crucial role in semi-urban and rural markets.

Digital adoption is changing buying behavior as well, with e-commerce and quick-commerce platforms providing convenience, privacy, and subscription options, particularly for adult hygiene and premium women’s products. In rural areas, however, kirana stores, chemists, and community outreach remain the most influential touchpoints. Increasingly, sustainability and environmental concerns are entering consumer conversations, especially among urban millennials and Gen Z, leading to interest in biodegradable diapers, eco-friendly sanitary pads, and chemical-free wipes.

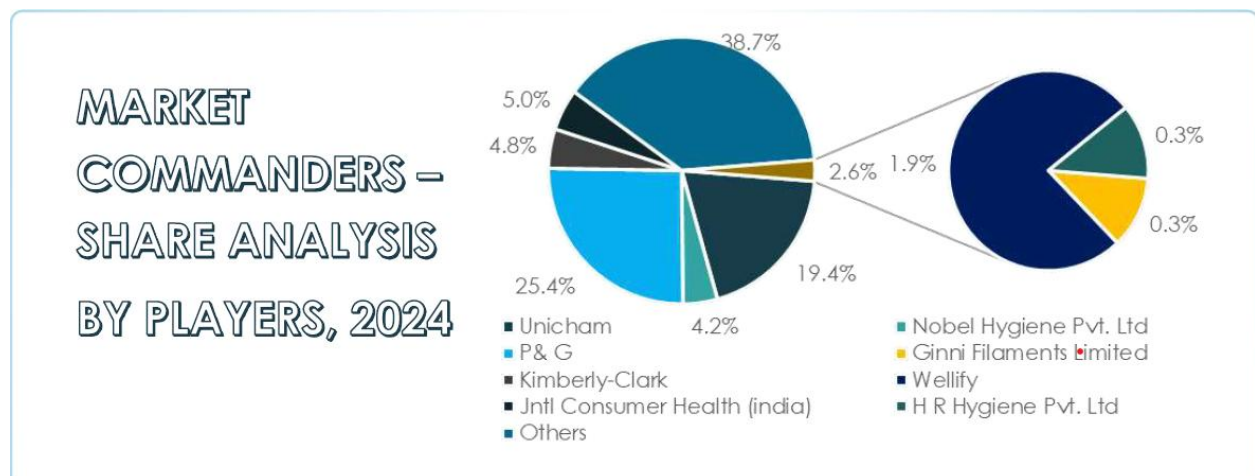

The brief summary pointers:

- **Demographic & Health Drivers:** India has a large young population (high birth rates) which fuels demand for baby diapers. Young, working parents are increasingly choosing disposable over cloth
- **Rising Hygiene & Health Awareness:** Public health campaigns (e.g., Swachh Bharat) and government / NGO initiatives are helping reduce stigma around menstrual hygiene and adult incontinence. This supports greater acceptance and usage.
- **Premiumization & Product Innovation:** There is demand for improved features: better absorbency, odor control, skinfriendly materials, breathable fabrics, slim designs, pull-on pants, wetness indicators. Eco-friendly / biodegradable products are gaining traction, especially among urban & environmentally conscious consumers.
- **Online & Omni-Channel Buying Behavior:** E-commerce is becoming an important channel due to convenience, wider variety, discounts, home delivery, and discreet purchase. Traditional retail (pharmacies, kirana stores, supermarkets) still play a major role, especially in semi-urban and rural areas, but their role is evolving with modern trade and digital integration.
- Overall, India’s hygiene product consumers are shifting toward a blend of **convenience, comfort, affordability, and eco-consciousness**, with clear differences between urban premium buyers and rural mass-market adopters.

As on the date of this Draft Red Herring Prospectus, our products are offered under four (4) distinct brands. Our flagship brand “Femiss” offers sanitary napkins, The “Womanica” line is positioned as a premium range, featuring premium sanitary napkins designed for enhanced comfort and protection. In addition, our “ElderFit” segment addresses the needs of adult incontinence care through adult diapers, while our “Bloom Baby” brand caters to infant care with baby diapers.

OUR MANUFACTURING / PRODUCTION PROCESS

Our step-by-step process for production of sanitary napkins is as follows:

1. Raw Material Preparation:

The key raw materials such as fluff pulp and superabsorbent polymers are prepared and loaded into the manufacturing line. Each material is mounted on reels and fed into the production line under tension-controlled systems. Materials that do not require reel feeding, such as absorbent polymers, are instead transferred through controlled tank absorption systems.

2. Core Formation:

The absorbent core, which forms the central functional layer of the napkin, is created using a blend of fluff pulp and superabsorbent polymers (SAP). Fluff pulp is defibrated and laid onto a conveyor system, where SAP is evenly distributed to enhance liquid retention. This layer may be formed through Tissue, air-laid or thermo-bonding processes, depending on product specifications.

3. Top Sheet Application:

A soft, non-woven fabric—often perforated for fluid permeability—is placed over the absorbent core to serve as the top sheet. This layer comes into direct contact with the user and is designed to remain dry and soft during use.

4. Back Sheet Application:

A polyethylene film or breathable back sheet is laminated or adhered to the bottom of the core to prevent leakage. This layer is water-resistant and may be printed or embossed, depending on brand specifications.

5. Shaping and Cutting:

The composite sheet is cut into individual sanitary napkin shapes using rotary or die-cutting machinery. The edges may be sealed or embossed to enhance product integrity and comfort.

6. Back Release Paper

After adhesives are applied on the back sheet and wings, a release paper is laminated over the adhesive strips. This ensures the adhesive remains protected and uncontaminated until use. The release paper is designed for easy removal by the consumer at the time of wearing.

7. Wing and Channel Embossin

For winged napkins, additional side flaps are cut and folded from the laminated structure. Channel embossing is performed via heated rollers to create pressure channels that direct fluid flow and improve structural integrity.

8. Adhesive Application:

Pressure-sensitive adhesives are applied to the back sheet, non-woven and wings to enable the sanitary napkin to adhere securely to undergarments. Release paper is then placed over the adhesive to protect it prior to use.

9. Pouch Film

In the case of 3-fold sanitary napkins, once the napkin is folded into three compact sections, a pouch film is wrapped around the folded napkin. This pouch film serves as hygienic primary packaging and also as a disposal pouch. It is sealed along the edges to maintain cleanliness and provides portability and discretion.

10. Packaging:

Each napkin is folded and individually wrapped in hygienic packaging. The individual units are then packed into consumer-ready retail packs and cartons for distribution. Inventory is labeled with batch numbers, manufacturing dates, and compliance marks before being moved to distribution warehouses or Consignment Selling Agents (CSAs).

GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. 1.1 Basis of Preparation of Restated Financial Statements: -

The Financial Statements are prepared on a historical cost basis by the accounting principles generally accepted in India (GAAP) and on accounting principles of going concern which are measured at fair values. These Financial Statements have been prepared to comply with all material aspects of the accounting standards notified under section 133 of the Act, (the "Act") read with Rule 7 of the Companies (Accounts) Rules, 2014, and the other relevant provisions of the Act.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policies hitherto in use.

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in Schedule III of the Act. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the current classification of assets and liabilities.

1.2 Use of Estimates: -

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities on the date of the financial statements and the results of operations during the reporting periods. Although these estimates are based upon management's knowledge of current events and actions, actual results could differ from those estimates, and revisions, if any, are recognized in the current and future periods.

1.3 Property, Plant and Equipment: -

1. Tangible Fixed Assets: -

All property, plant and equipment are stated at cost, which includes capitalized borrowing costs, less accumulated depreciation, and impairment loss, if any. Cost includes purchase price, including non-refundable duties and taxes, expenditure that is directly attributable to bring the assets to the location and condition necessary for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located, if any

Properties in the course of construction for production, supply, or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes professional fees and for qualifying assets, borrowing costs capitalized in accordance with the Company's accounting policies. Such properties are classified into the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use. Spare parts are treated as capital assets

When they meet the definition of property, plant and equipment. Otherwise, such items are classified as inventory.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for, as separate items (major components) of property, plant and equipment. Any gains or losses on their disposal, determined by comparing sales proceeds with the carrying amount, are recognized in the Statement of Profit or Loss.

Subsequent expenditure: -

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

De-Recognition: -

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected to arise from its use. Any gain or loss arising from its de-recognition is measured as the difference between the net disposal proceeds and the carrying amount of the asset and is recognized in the Statement of Profit and Loss when the asset is de-recognized.

Depreciation methods, estimated useful lives and residual value: -

Depreciation on property, plant and equipment is provided using the written down value method based on the life and in the manner prescribed in Schedule II to the Companies Act, 2013, and is generally recognized in the statement of profit and loss. The cost of Leasehold is amortized over the tenure of the lease agreement. Freehold land is not depreciated. In the case where the cost of part of the asset is significant to the total cost of the asset and the useful life of that part is different from the useful life of the remaining assets, the useful life of that significant part has been determined separately.

ASSET GROUP	USEFUL LIFE
BUILDING AND STRUCTURES	30 Year
COMPUTERS EQUIPMENT	3 Year
PRINTER	3 Year
ELECTRIC FITTINGS	10 Year
CAR	8 Year
VEHICLES	10 Year
OFFICE EQUIPMENT	5 Year
PLANT AND MACHINERY	15 Year

The depreciation methods, useful lives, and residual values are reviewed at each financial year-end and adjusted if appropriate. Based on technical evaluation and consequent advice, the management believes that its estimates of useful lives as given above best represent the period over which management expects to use these assets. Depreciation on additions (disposals) is provided on a pro-rata basis i.e. from (up to) the date on which the asset is ready for use (disposed of).

Capital work in progress: -

Properties in the course of construction for production, supply, or administrative purposes are carried at cost, less any recognized impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalized in accordance with the Company's accounting policy. Such properties are classified into the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use

2. Intangible assets: -

Intangible assets are carried at cost less accumulated amortization and impairment losses, if any. The cost of an intangible asset comprises its purchase price and any directly attributable expenditure on making the asset ready for its intended use, net of any trade discounts and rebates. Subsequent expenditure on an intangible asset after its purchase is recognized as an expense when incurred unless it is probable that such expenditure will enable the asset to generate future economic benefits over its originally assessed standards of performance and such expenditure can be measured and attributed to the asset reliably, in which case such expenditure is added to the cost of the asset.

1.4 Revenue Recognition: -

Revenue is measured at the fair value of the consideration received or receivable where the ownership and significant risk have been transferred to the buyer.

Sales returns are accounted for / provided for in the year in which they pertain to, as ascertained till the finalization of the books of account.

Compensation on account of crop quality discounts is accounted for as and when settled.

1.5 Taxes on Income: -

INCOME TAX: -

Provision for Current Tax is made and retained in the accounts on the basis of estimated tax liability as per applicable provisions of the Income Tax Act 1961.

DEFERRED TAX: -

Deferred tax is recognized on temporary differences between the Carrying Amount of assets and Liabilities in the Financial Statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

The Company recognizes interest levied and penalties related to Income Tax assessments in the tax expense.

1.6 Earnings per Share: -

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.

1.7 Provisions/Contingencies: -

Provisions: Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Contingent Liabilities: Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

1.8 Borrowing Cost: -

Borrowing costs directly attributable to the acquisition, construction, or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets until the assets are substantially ready for their intended use. All other borrowing costs are recognized in the Statement of Profit and Loss in the period in which they are incurred. The Company determines the amount of borrowing costs eligible for capitalization as the actual borrowing costs incurred on that borrowing during the period less any interest income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets, to the extent that an entity borrows funds specifically for the purpose of obtaining a qualifying asset.

In case the Company borrows generally and uses the funds for obtaining a qualifying asset, borrowing costs eligible for capitalization are determined by applying a capitalization rate to the expenditures on that asset. The Company suspends capitalization of borrowing costs during extended periods in which it suspends the active development of a qualifying asset.

1.9 Foreign Currency Transactions: -

Transactions denominated in foreign currencies are normally recorded at the exchange rate prevailing at the time of the transaction. Any Income or expense on account of exchange difference either on settlement or translation is recognized in the profit and loss account. Monetary assets and liabilities relating to foreign currency transactions and forward exchange contracts remaining unsettled at the end of the year are translated at year-end rates. Further, with respect to transactions covered by forward exchange contracts, the difference between the contract rate and the spot rate on the date of the transaction is charged to the Profit & Loss Account over the period of the contract.

1.10 Impairment of Assets: -

Assessment is done at each Balance Sheet date as to whether there is any indication that an asset may be impaired. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets is considered as a cash-generating unit. If any such indication exists, an estimate of the recoverable amount of the asset/cash-generating unit is made. Assets whose carrying value exceeds their recoverable amount are written down to the recoverable amount.

The recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Assessment is also done at each Balance Sheet date as to whether there is any indication that an impairment loss recognized for an asset in prior accounting periods may no longer exist or may have decreased.

1.11 Extra Ordinary Items:

The income or expenses that arise from the events or transactions which are distinct from the ordinary activities of the Company and are not recurring in nature are treated as extraordinary items. The extraordinary items are disclosed in the statement of profit and loss as a part of net profit or loss for the period in a manner so as the impact of the same on current profit can be perceived.

1.12 Employee Benefits:

Accounting Standard 15 on 'Employee Benefits' as prescribed under Section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014

For more details, please refer chapter titled “Our Business” beginning on page 130 of this Draft Red Herring Prospectus.

SIGNIFICANT DEVELOPMENTS AFTER MARCH 31, 2025

In the opinion of the Board of Directors of our Company, since the date of the last financial year as stated in this Draft Red Herring Prospectus, there have not arisen any circumstance that materially or adversely affect or are likely to affect the profitability of our Company or the value of its assets or its ability to pay its material liabilities within the next twelve months.

1. Pursuant to a resolution passed by our Board on August 25, 2025 and our Shareholders on September 17, 2025, our Company has increased the authorized share capital from existing Rs. 10,00,00,000/- (Rupees Ten Crore) divided into 1,00,00,000 (One Crore) Equity Shares of Rs. 10/- each (Rupee Ten only) to Rs. 25,00,00,000/- (Rupees Twenty-five Crore) divided into 2,50,00,000 (Two Crore and fifty lakhs) Equity Shares of Rs. 10/- each (Rupee Ten only).
2. Pursuant to a resolution passed by our Board on August 25, 2025 and our Shareholders on September 17, 2025 our Company has issued bonus shares in the ratio of 15:10 ie.; for every 10 shares held, 15 bonus equity shares has been issued.

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business is subject to various risks and uncertainties, including those discussed in the section titled “Risk Factors” on page 29 beginning of this Draft Red Herring Prospectus.

Our Company’s future results of operations could be affected potentially by the following factors:

1. Raw Material & Supply Chain

This combined risk factor addresses the company's vulnerability to supply chain disruptions. Our raw materials are sourced from suppliers in the U.S. and India, with whom we have built longstanding relationships; however, we do not enter into long-term agreements, leaving us vulnerable to price fluctuations and supply uncertainties. Expenditure for materials consumed comprised 41.97 %, 47.21% and 43.14% of our revenue from operations for the financial Fiscals 2025, 2024 and 2023, respectively. The company's heavy reliance on imported fluff pulp and the scarcity of Super Absorbent Polymer (SAP) both of which could impact raw material supply and production. Additionally, logistics bottlenecks such as transport strikes, road blockages or port congestion can disrupt both raw material inflow and the distribution of finished products.

Particulars	Purchase of raw materials					
	March 31, 2025		March 31, 2024		March 31, 2023	
	₹ In lakhs	%	₹ In lakhs	%	₹ In lakhs	%
Import	1541.23	38.60%	2370.42	46.62%	1312.51	56.45%
Domestic	2451.36	61.40%	2713.70	53.38%	1012.57	43.55%
Total	3,992.59	100.00	5,084.12	100.00	2,325.08	100.00

Distribution is managed through Consignment Sole Agents (CSAs) with a presence in 11 states. CSAs are responsible for storage, handling, and timely distribution of products within their territories, though our non-exclusive arrangements may limit long-term stability and control. Transportation is carried out through third-party providers primarily by road which adds to operational risk.

2. Our business is dependent on our manufacturing facility and the loss of or shutdown of operations of any of these facilities could adversely affect our business

Our company’s business faces a high operational risk due to its reliance on a single, modern manufacturing facility in Rajkot, Gujarat. The concentration of the entire production capacity in one location makes the company extremely vulnerable to any event that could cause a shutdown. Should a natural disaster, fire, major power outage, or an internal issue like machinery failure or a labour strike occur, all production would cease. This would lead to a complete loss of revenue, as the company would be unable to full-fill orders. In addition, extended shutdowns could damage the company's reputation, potentially causing distributors and key customers to seek more reliable suppliers. Cybersecurity incidents, contamination, or quality control failures could also force temporary shutdowns or product recalls, affecting both revenue and brand trust. The resulting loss of revenue, coupled with fixed operational expenses, could impact the company’s ability to meet debt obligations and jeopardize its long-term viability as an unlisted, un-funded entity.

3. Market & Competitive Risks

This combined risk factor details the challenges we face from market dynamics. The company is vulnerable to aggressive pricing strategies by competitors, which could impact its margins and cash flow. The company's EBITDA margin was 12.50% in 2025, an increase from 7.09% in 2024, and its Net Profit Ratio was 10.51% in

2025, up from 7.77% in 2024, indicating recent profitability improvements. And the shift in consumer preferences towards eco-friendly alternatives like menstrual cups, reusable pads, and tampons, which could shrink the addressable market.

4. *The Impact of Government Policy and Regulation*

The impact of government policy and regulation on a company is multifaceted, as it encompasses regulatory compliance, the influence of government initiatives, and broader economic conditions. New regulations, such as Quality Control Orders (QCOs) from the Bureau of Indian Standards (BIS), require products to meet stringent criteria and carry the ISI mark. While this is a non-negotiable requirement that demands significant investment in testing and factory inspections, it can ultimately enhance consumer trust and provide a competitive advantage. The market is also positively influenced by government programs that promote menstrual hygiene, such as the Menstrual Hygiene Scheme and the Pradhan Mantri Bharatiya Janaushadhi Pariyojna (PMBJP). These initiatives increase awareness and accessibility in rural and underserved areas, thereby expanding the potential consumer base. Additionally, during economic slowdowns or periods of high inflation, consumers may switch to cheaper alternatives, negatively impacting sales. Conversely, periods of robust economic growth and rising disposable incomes can lead to a trend of "premiumization," where consumers are more willing to spend on higher-quality, branded products.

5. *Indirect Taxation on our Products*

Our products are subject to various forms of indirect taxation, including sales tax, value-added tax (VAT), and excise duties. These taxes are currently determined based on prevailing tariff classifications and rates. Any changes in tariff classifications, rates, or both could increase our tax burden, thereby adversely affecting our cost structure and profitability. Additionally, evolving taxation policies in India or other markets could create uncertainty in pricing strategies and impact overall competitiveness.

6. *Macroeconomic Factors*

The performance of our business is closely linked to macroeconomic conditions. Economic downturns, recessions, political instability, social unrest, or natural disasters in India or our other markets can disrupt operations, supply chains, and consumer demand. Furthermore, volatility in crude oil prices, rising interest rates, and inflationary pressures can increase operational costs, reduce margins, and affect consumer spending patterns, all of which can materially impact our financial results.

The scale of our operations and vast distribution network along with our customers' confidence have had a significant impact on our revenues and profitability. Set out below are a few key performance indicators

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of, amongst others equity shares. Pursuant to the SEBI UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by IBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the SEBI UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an II had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of

the ASBA Form by IIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (“T+3 Notification”). In this phase, the time duration from public offer closure to listing has been reduced from six Working Days to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

This Offer will be made under UPI Phase III of the UPI Circular.

All SCSBs offering the facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchange and NPCI in order to facilitate collection of requests and/or payment instructions of the Individual Bidders using the UPI Mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors’ complaints, the relevant SCSB as well as the Book Running Lead Manager will be required to compensate the concerned investor.

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks make an application as prescribed in Annexure I of SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 and provide a written confirmation on compliance with SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Further, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/45 dated April 5, 2022, all UPI Bidders applying in public Offers where the application amount is up to ₹ 5,00,000 shall use the UPI Mechanism and shall also provide their UPI ID in the Bid cum Application Form submitted with any of the entities mentioned herein below:

The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which is effective from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. Under the current FDI Policy, 100% foreign direct investment is permitted in the other financial services sector, under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. For further details of the aggregate limit for investments by NRIs and FPIs in our Company, see “Offer Procedure – Bids by Eligible NRIs” and “Offer Procedure – Bids by FPIs” on page 293 respectively. As per the existing policy of the Government of India, OCBs cannot participate in this Offer. For further details, see “Offer Procedure” on page 282

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non-Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.

The Equity Shares offered in the Offer have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers, and sales occur.

The Equity Shares have not been and will not be registered, listed, or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Bidders. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations which may occur after the date of this Draft Prospectus. Bidders are advised to make their independent investigations and ensure that the number of Equity Shares Bid for do not exceed the applicable limits under laws or regulations.
